BrightTV · Analytics Report

Who's watching, when, and why.

An interactive deep-dive into 9,995 viewing sessions across 21 channels — uncovering audience trends, consumption drivers, and a roadmap to grow the BrightTV user base.

Jan–Apr 2016 · Source: BrightTV session log (9,995 records)

EXECUTIVE SUMMARY

At a glance

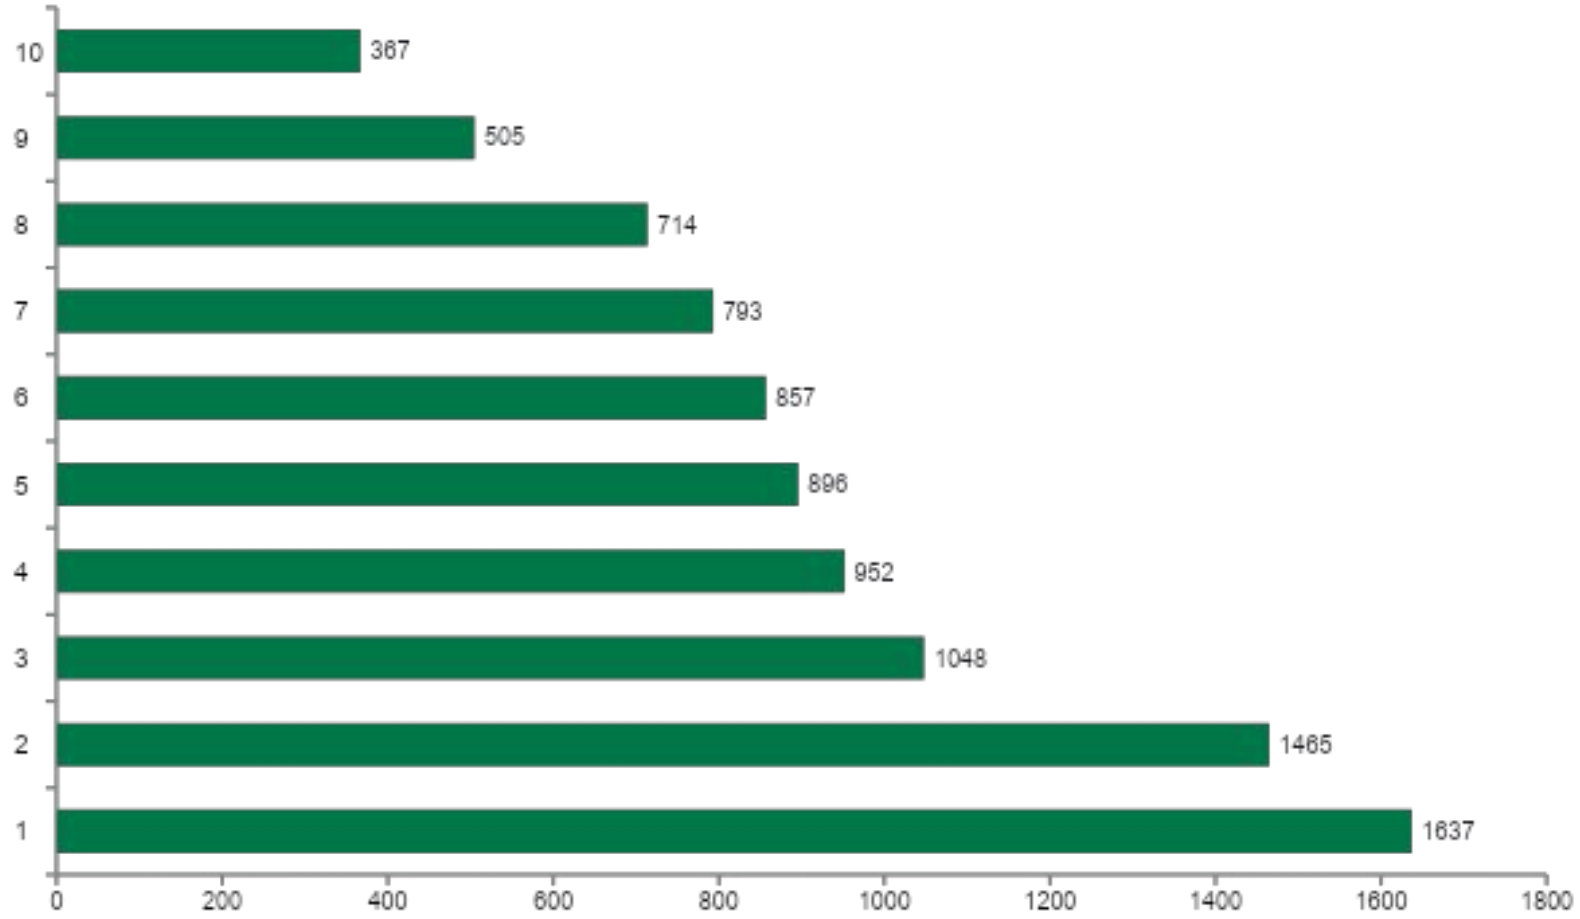
Key metrics from 9,995 viewing sessions across 21 channels.

TOTAL SESSIONS	WATCH HOURS	CHANNELS	AVG SESSION
9,995	1,522	21	9.1m

- **Sport dominates** Cricket + Supersport drive 31% of sessions and 48% of watch hours.
- **Skim culture** 69% of sessions end in under 1 minute — major retention opportunity.
- **Skewed audience** 88% male · 36% Gauteng — female (10%) & senior (0.5%) underserved.
- **Fast growth** Sessions grew +119% from January to March.

Top channels by sessions

Sport & music carry the platform — the top 4 channels = 51% of all sessions.



INSIGHT

Sport is the engine.

Supersport + ICC Cricket alone deliver 31% of all sessions and 48% of watch hours.

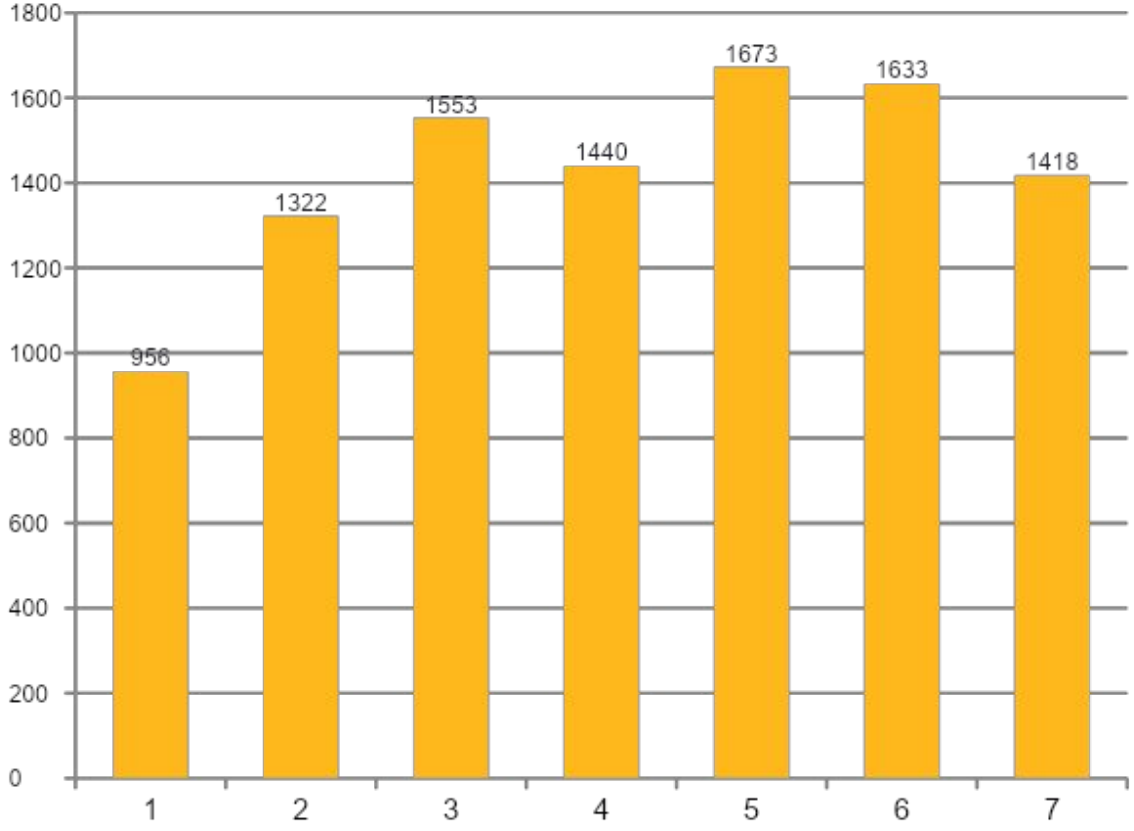
Music (Channel O, Trace) is a strong #2 vertical with high avg watch time (~12 min).

Africa Magic has reach but very low engagement (3.4 min) — premium drama opportunity.

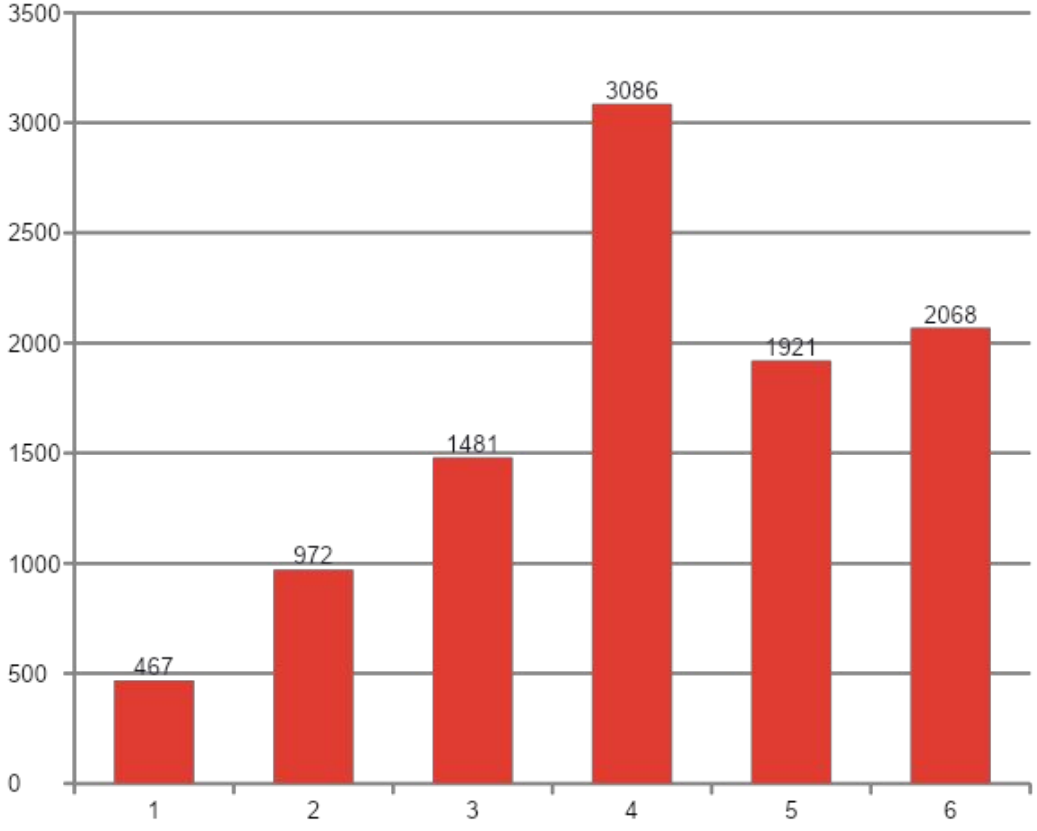
When are people watching?

Friday & Saturday peak; Monday slumps. Afternoons are the powerhouse.

Sessions by day of week

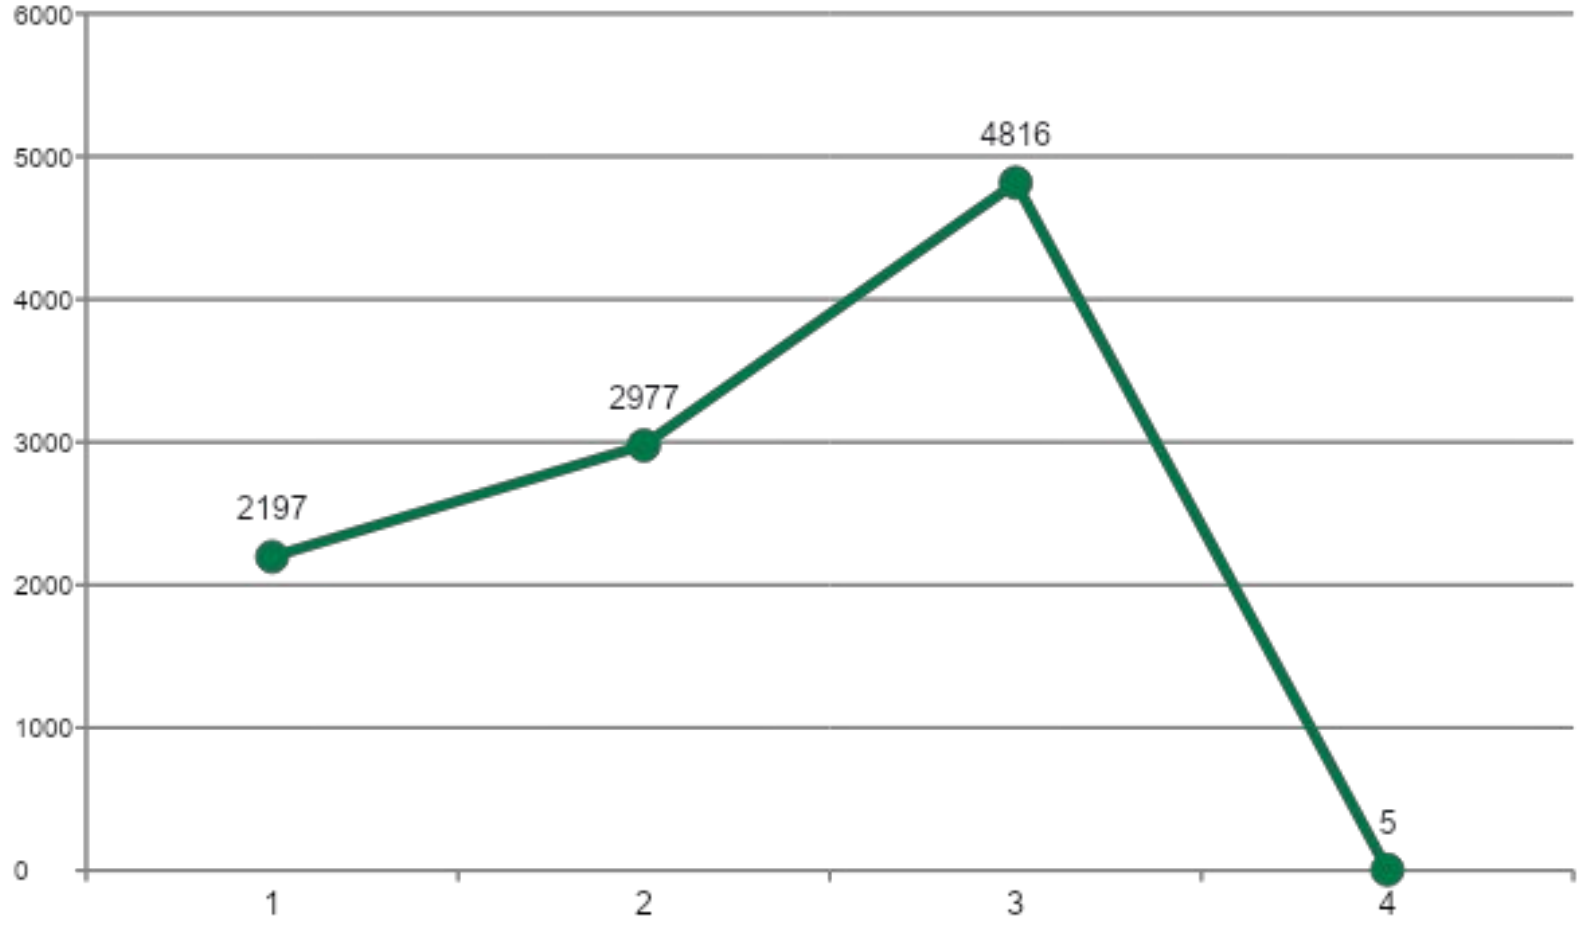


Sessions by daypart



Monthly growth trajectory

Sessions more than doubled Jan → Mar. April data is partial (5 records).



+119%

Session growth
Jan → March

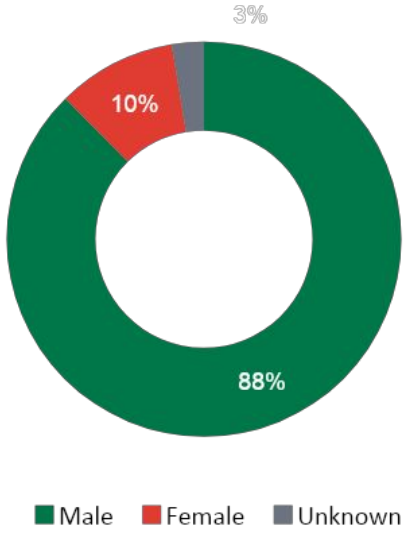
WHAT'S DRIVING IT

- ICC Cricket World Cup 2011 ran Feb–Apr — pulled major audiences.
- Supersport Live Events grew month-over-month.
- Continued Q2 momentum requires non-sport content investment.

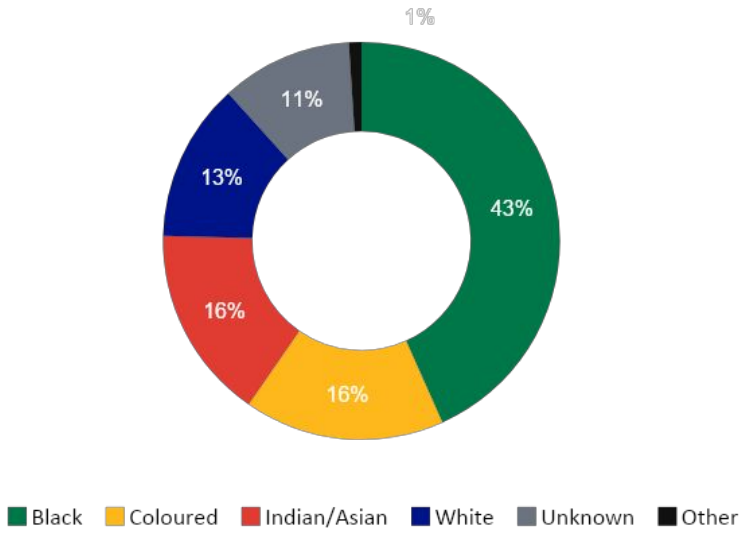
What influences consumption?

Demographic and geographic factors shaping who watches BrightTV.

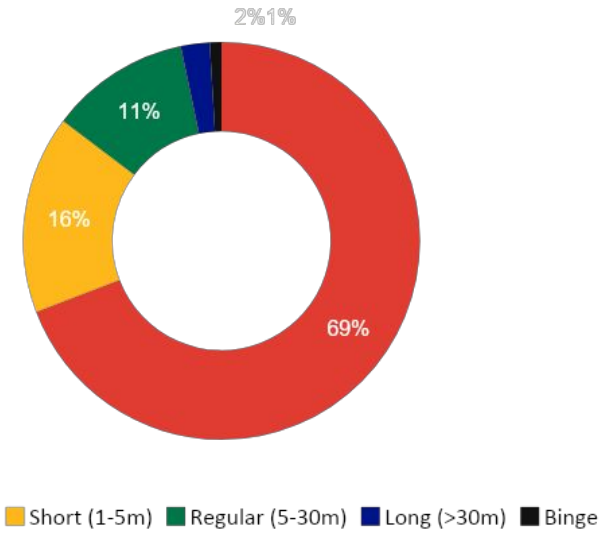
Gender



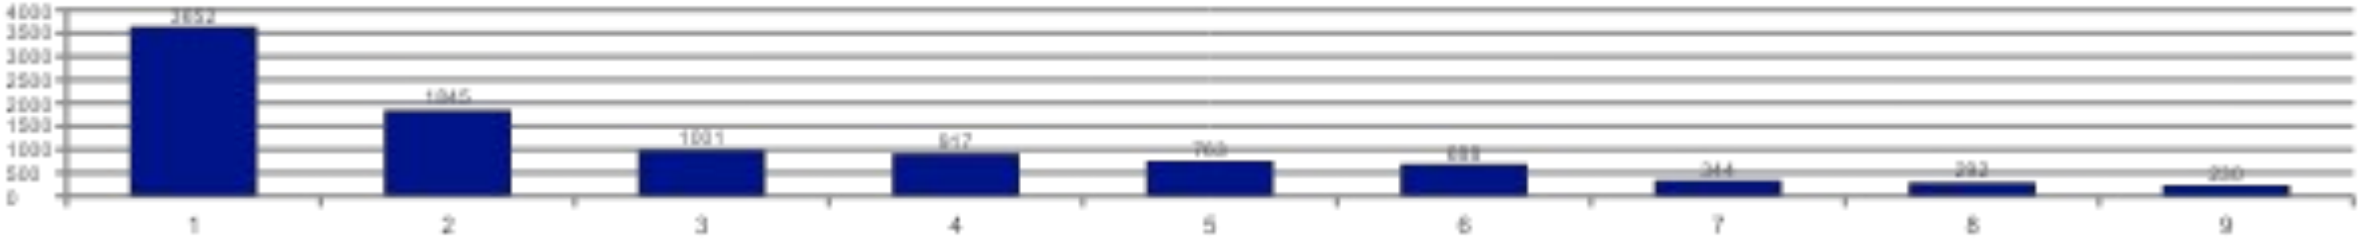
Race



Watch depth



Sessions by province



What the demographics tell us

Four structural patterns shaping consumption today.

AUDIENCE

88% male skew

Female viewers are just 10% of sessions. Content mix is heavily sport-led, alienating broader households.

GEOGRAPHY

Gauteng-heavy

36% of sessions come from Gauteng. Northern Cape, Free State & North West together contribute under 9%.

BEHAVIOUR

69% are skims

Most sessions end in under 1 minute. Only 3.3% are long-form or binge — viewers are browsing, not committing.

AGE

Young Adult dominant

Young Adults (57%) and Adults (34%) carry the platform. Children (3.6%) and Seniors (0.5%) are practically absent.

Boosting low-consumption days

A content playbook for Mondays, Sundays and off-peak windows.

LOWEST DAY · 956 SESSIONS

Monday Momentum

1. Launch 'Monday Night Live' sports — cricket / football replays + studio analysis (mirrors top-performing ICC content).
2. Premiere new Africa Magic dramas Monday 19h to anchor evening peak.
3. Cartoon Network kids block 15h–18h to capture after-school youth.

SHORT AVG · 8.25 MIN

Sunday Stretch

1. Sunday family-movie premieres on M-Net to lengthen sessions.
2. Music marathons on Channel O & Trace TV during afternoon peak.
3. Sunday faith & lifestyle programming for adult demo (35+).

MORNING PEAK · 7 MIN AVG

Off-Peak Activation

1. Breakfast news + sport highlights to boost 06–08h engagement.
2. Re-air ICC Cricket condensed-game format for commute viewing.
3. Push notifications for low-consumption viewers on Mon/Sun.

Initiatives to grow the user base

Six strategic bets, prioritised by the gaps in the data.

01 Win the Female Audience

Only 10% of viewers are female. Launch lifestyle, telenovela and reality blocks; partner with E! and African studios.

02 Convert Skimmers to Watchers

69% of sessions end under 1 min. Personalised 'Continue Watching', better thumbnails, short-form previews.

03 Geographic Expansion

Northern Cape, Free State, NW = <9% combined. Localised content + provincial sports + low-bandwidth packages.

04 Sports as Acquisition Engine

Sport drives 48% of watch hours. Bundle live sport with second-screen stats and premium ad-free tiers.

05 Family & Senior Bundles

Children (3.6%) & Seniors (0.5%) tiny. Multi-profile plans, parental controls, senior-friendly UI.

06 Data-Driven Recommendations

Build a recommendation engine — viewers love sport + music; cross-promote Channel O, Trace, Supersport.
